1 INTRODUCTION

1.1 PROJECT DESCRIPTION

MyAnimeList, often abbreviated as MAL, is the largest anime and manga database in the world that facilitates finding users who share similar tastes and provides them a list-like system to organize and score anime and manga. There are several modules which are integrated to fulfill the purpose.

MyAnimeList also provides access to a free API (Application Programming Interface) that can be used to programmatically interact with several aspects of the website. Likewise, it can be used to build both hobbyist and commercial applications.

1.2   OBJECTIVE

The purpose of the document is:

- •   To explain the various activities performed as part of the Testing of the application.
- •   To summarize what was tested according to the test plan.
- •   To summarize the test results.
- •   To determine whether testing has been satisfactorily completed.
